The important and rapidly emerging new field known as 'cyber threat intelligence' explores the paradigm that defenders of computer networks gain a better understanding of their adversaries by understanding what assets they have available for an attack. In this book, a team of experts examines a new type of cyber threat intelligence from the heart of the malicious hacking underworld - the dark web. These highly secure sites have allowed anonymous communities of malicious hackers to exchange ideas, techniques and buy/sell malware and exploits. Aimed at both cybersecurity practitioners and researchers, this book represents a first step toward a better understanding of malicious hacking communities on the dark web and what to do about them. The authors examine real-world darkweb data through a combination of human and automated techniques to gain insight into these communities, describing both methodology and results.

From reader reviews:

Christine McClellan:

Do you have favorite book? If you have, what is your favorite's book? E-book is very important thing for us to learn everything in the world. Each reserve has different aim or goal; it means that guide has different type. Some people really feel enjoy to spend their the perfect time to read a book. They are reading whatever they consider because their hobby will be reading a book. Consider the person who don't like studying a book? Sometime, man or woman feel need book if they found difficult problem as well as exercise. Well, probably you will require this Darkweb Cyber Threat Intelligence Mining.

Jeff Farley:

What do you think about book? It is just for students since they are still students or the item for all people in the world, the particular best subject for that? Simply you can be answered for that problem above. Every person has several personality and hobby for every other. Don't to be obligated someone or something that they don't want do that. You must know how great and also important the book Darkweb Cyber Threat Intelligence Mining. All type of book is it possible to see on many sources. You can look for the internet solutions or other social media.

Cheryl Ruiz:

As we know that book is important thing to add our information for everything. By a publication we can know everything you want. A book is a list of written, printed, illustrated as well as blank sheet. Every year has been exactly added. This book Darkweb Cyber Threat Intelligence Mining was filled about science. Spend your time to add your knowledge about your technology competence. Some people has diverse feel when they reading the book. If you know how big selling point of a book, you can really feel enjoy to read a book. In the modern era like at this point, many ways to get book that you wanted.

Yolanda Nitta:

Some individuals said that they feel bored stiff when they reading a publication. They are directly felt the item when they get a half elements of the book. You can choose the particular book Darkweb Cyber Threat Intelligence Mining to make your reading is interesting. Your own personal skill of reading proficiency is developing when you including reading. Try to choose very simple book to make you enjoy to see it and mingle the idea about book and reading especially. It is to be first opinion for you to like to wide open a book and go through it. Beside that the book Darkweb Cyber Threat Intelligence Mining can to be your brand-new friend when you're experience alone and confuse with the information must you're doing of that time.
