Eta Products and Theta Series Identities (Springer Monographs in Mathematics)

Günter Köhler

Eta Products and Theta Series Identities (Springer Monographs in Mathematics) Günter Köhler
This monograph deals with products of Dedekind's eta function, with Hecke theta series on quadratic number fields, and with Eisenstein series. The author brings to the public the large number of identities that have been discovered over the past 20 years, the majority of which have not been published elsewhere.
The book will be of interest to graduate students and scholars in the field of number theory and, in particular, modular forms. It is not an introductory text in this field. Nevertheless, some theoretical background material is presented that is important for understanding the examples in Part II of the book.
In Part I relevant definitions and essential theorems -- such as a complete proof of the structure theorems for coprime residue class groups in quadratic number fields that are not easily accessible in the literature -- are provided. Another example is a thorough description of an algorithm for listing all eta products of given weight and level, together with proofs of some results on the bijection between these eta products and lattice simplices.

From reader reviews:

Reginald McDade:

Why don't make it to become your habit? Right now, try to ready your time to do the important work, like looking for your favorite publication and reading a guide. Beside you can solve your problem; you can add your knowledge by the reserve entitled Eta Products and Theta Series Identities (Springer Monographs in Mathematics). Try to the actual book Eta Products and Theta Series Identities (Springer Monographs in Mathematics) as your friend. It means that it can to be your friend when you really feel alone and beside that course make you smarter than ever before. Yeah, it is very fortuned for yourself. The book makes you much more confidence because you can know almost everything by the book. So , let's make new experience and knowledge with this book.

Michael Stanford:

The book Eta Products and Theta Series Identities (Springer Monographs in Mathematics) make one feel enjoy for your spare time. You need to use to make your capable considerably more increase. Book can to become your best friend when you getting strain or having big problem with the subject. If you can make reading a book Eta Products and Theta Series Identities (Springer Monographs in Mathematics) being your habit, you can get a lot more advantages, like add your own capable, increase your knowledge about some or all subjects. You are able to know everything if you like open and read a reserve Eta Products and Theta Series Identities (Springer Monographs in Mathematics). Kinds of book are several. It means that, science e-book or encyclopedia or other folks. So , how do you think about this book?

Rene Hudson:

Here thing why that Eta Products and Theta Series Identities (Springer Monographs in Mathematics) are different and trustworthy to be yours. First of all studying a book is good however it depends in the content of the usb ports which is the content is as delightful as food or not. Eta Products and Theta Series Identities (Springer Monographs in Mathematics) giving you information deeper and different ways, you can find any guide out there but there is no e-book that similar with Eta Products and Theta Series Identities (Springer Monographs in Mathematics). It gives you thrill reading journey, its open up your eyes about the thing which happened in the world which is possibly can be happened around you. You can bring everywhere like in playground, café, or even in your technique home by train. In case you are having difficulties in bringing the paper book maybe the form of Eta Products and Theta Series Identities (Springer Monographs in Mathematics) in e-book can be your choice.

Herbert Mikula:

This Eta Products and Theta Series Identities (Springer Monographs in Mathematics) is brand new way for you who has intense curiosity to look for some information mainly because it relief your hunger associated with. Getting deeper you on it getting knowledge more you know or else you who still having bit of digest in

reading this Eta Products and Theta Series Identities (Springer Monographs in Mathematics) can be the light food for you because the information inside this kind of book is easy to get simply by anyone. These books create itself in the form that is reachable by anyone, yep I mean in the e-book form. People who think that in e-book form make them feel tired even dizzy this e-book is the answer. So there is no in reading a publication especially this one. You can find actually looking for. It should be here for anyone. So , don't miss it! Just read this e-book style for your better life in addition to knowledge.
