Shapes in Art: Level 3 (Mathematics Readers) Julia Wall
Learn about two-dimensional shapes by identifying them in famous works of art! Young readers will practice and enhance their geometry and STEM skills, identifying shapes and familiarizing themselves with new concepts and vocabulary terms like angles, tangrams, and lines of symmetry. This book provides clear diagrams and vibrant examples that will teach children about geometry and art simultaneously, while making them feel more confident in their mathematical skills. Follow-up activities encourage children to use two-dimensional shapes to make their own geometric works of art!

About Shell Education
Rachelle Cracchiolo started the company with a friend and fellow teacher. Both were eager to share their ideas and passion for education with other classroom leaders. What began as a hobby, selling lesson plans to local stores, became a part-time job after a full day of teaching, and eventually blossomed into Teacher Created Materials. The story continued in 2004 with the launch of Shell Education and the introduction of professional resources and classroom application books designed to support Teacher Created Materials curriculum resources. Today, Teacher Created Materials and Shell Education are two of the most recognized names in educational publishing around the world.
