White Religion and Black Humanity Harry H., III Singleton
In this insightful work, Harry H. Singleton, III, analyzes the white religious establishment's use of Christian faith throughout American history to link divine will with black oppression. This exploitation establishes Christian faith as the single most persuasive tool in convincing whites of their superiority and blacks of their inferiority. Singleton calls for a reexamination of the major categories of Christian theology due to its misuse by many leading white clergy and theologians. He constructs a more liberating approach to Christian faith by freeing it from its convenient concerns with heaven more than the earth, with the church more than the world, and with the individual more than the community. This book is a must-read for anyone interested in both the historical and contemporary impact of Christian faith on the current racial situation in America.
