The New Beginner Online Day Trader and Stock Investor Reference Bible (Brand new investors and day traders series) J. R. Zordi
This book is for brand new investors and traders who have zero experience in the markets and want to learn how to invest and trade. Its the definitive source for the first information for anyone wishing to start their own online investing and trading business. This book covers some of the things that brand new online investors and day traders need to know before they ever study anything or do anything. The amount of information that is out there online is overwhelming and this bible eBook means to give brand new investors and day traders a starting point for all of the information they will need to know. In the investing and online day trading business it is about having and learning the right information from the first day and doing things the right way the first time. This book aims to help brand new investors and traders coming into the business and give them a head start putting them on the fast track to making some money everyday in the live markets. This book can help you filter the huge amount of information out there down to what you need to know right away and then can work towards adding more information and studies as you go. My philosophy is to start small and build on success. Have limited exposure while you hone your skills then progress as you become more competent. I am giving you clear, concise and highly informative information in this book that would take you years to uncover on your own. No amount of search engine queries' could come up with all of the information I am giving you in this book in one place let alone at one time. I do not ever presume to tell you how to run your life however if you do what it says in this eBook your life and that of your family can be MUCH easier if you do it the right way the first time! Everything I have written in this book I have personally experienced from being in the trenches and battling the Smart Money for profits and I hope that once you read this whole book through the first time you will not have to go through what I did when I was first coming up and learning investing and trading. The road to success in investing and trading is paved with the smoking blown up accounts of investors and traders. It did not have to be a long hard and expensive road. It can be a road paved with gold and be fairly easy if you just take time to learn this business the right way from the start on your first day. Keep it simple and it will be. In this book I give you brutally honest realism of investing and trading and what you need to know. The GOOD and the BAD before you even start to study anything. I tell you everything NOT to do that causes people who come into this business with dollar signs in the eyes to get FUBAR by the Smart Money. I give simple explanations that even a 12 year old can understand. If you read a passage in this book and it says hey "don't do this" then guess what? DON'T DO IT!! You can use this book and the references, suggestions and tips in it to go further into your educational studies of the markets and there dynamics. Knowing market dynamics is going to be critical for you to have the winning edge you will need to be a successful market participant. By studying what this book suggests you will not become one of the 97% of the sheeple of the herd. By the time you complete your reading of this book you will know: The first information to study to get you going in the markets. How and where to get information. Becoming a successful self-directed investor and trader is not nearly as difficult as one would think as long as they have the proper education and proper knowledge base right from day one.
