New Century Biology

KRESS J W

New Century Biology KRESS J W
In the twentieth century, scientists in the relatively new field of biology played an important role in exposing the threats of environmental degradation, loss of species diversity, habitat fragmentation, scarce energy resources, and human population growth. In the essays found in A New Century of Biology, some of the world's most notable biologists consider how their discipline must evolve to address these problems in the twenty-first century. The eleven contributors are leaders in the fields of ecology, and evolution, morphology, and development, behavior, microbiology, ecosystem energetics and biogeochemistry, biodiversity and conservation biology, and human sciences.
