The Gestural Communication of Apes and Monkeys

The Gestural Communication of Apes and Monkeys
The Gestural Communication of Apes and Monkeys is an intriguing compilation of naturalistic and experimental research conducted over the course of 20 years on gestural communication in primates, as well as a comparison to what is known about the vocal communication of nonhuman primates. The editors also make systematic comparisons to the gestural communication of prelinguistic and just-linguistic human children. An enlightening exploration unfolds into what may represent the starting point for the evolution of human communication and language.

This especially significant read is organized into nine chapters that discuss:
*the gestural repertoire of chimpanzees;
*gestures in orangutans, subadult gorillas, and siamangs;
*gestural communication in Barbary macaques; and
*a comparison of the gestures of apes and monkeys.

This book will appeal to psychologists, anthropologists, and linguists interested in the evolutionary origins of language and/or gestures, as well as to all primatologists. A CD insert offers video of gestures for each of the species.
