My Double Unveiled: The dissipative quantum model of brain (Advances in Consciousness Research)
Giuseppe Vitiello
This introduction to the dissipative quantum model of brain and to its possible implications for consciousness studies is addressed to a broad interdisciplinary audience. Memory and consciousness are approached from the physicist point of view focusing on the basic observation that the brain is an open system continuously interacting with its environment. The unavoidable dissipative character of the brain functioning turns out to be the root of the brain's large memory capacity and of other memory features such as memory association, memory confusion, duration of memory. The openness of the brain implies a formal picture of the world which is modeled on the same brain image: a sort of brain copy or "Double", where world objectiveness and the brain implicit subjectivity are conjugated. Consciousness is seen to arise from the permanent "dialogue" of the brain with its Double.
The author's narration of his (re-)search gives a cross-over of the physics of elementary particles and condensed matter, and the brain's basic dynamics. This dynamic interplay makes for a "satisfying feeling of the unity of knowledge". (Series A)

From reader reviews:

Elizabeth Rodrigues:

The reserve untitled My Double Unveiled: The dissipative quantum model of brain (Advances in Consciousness Research) is the e-book that recommended to you to see. You can see the quality of the e-book content that will be shown to a person. The language that creator use to explained their ideas are easily to understand. The copy writer was did a lot of exploration when write the book, so the information that they share to your account is absolutely accurate. You also might get the e-book of My Double Unveiled: The dissipative quantum model of brain (Advances in Consciousness Research) from the publisher to make you far more enjoy free time.

Sylvia Healey:

People live in this new morning of lifestyle always make an effort to and must have the free time or they will get lot of stress from both lifestyle and work. So , whenever we ask do people have spare time, we will say absolutely without a doubt. People is human not really a robot. Then we consult again, what kind of activity do you have when the spare time coming to anyone of course your answer will unlimited right. Then ever try this one, reading guides. It can be your alternative within spending your spare time, the particular book you have read is definitely My Double Unveiled: The dissipative quantum model of brain (Advances in Consciousness Research).

Catherine Poppe:

Beside this kind of My Double Unveiled: The dissipative quantum model of brain (Advances in Consciousness Research) in your phone, it could give you a way to get nearer to the new knowledge or info. The information and the knowledge you may got here is fresh from oven so don't always be worry if you feel like an previous people live in narrow village. It is good thing to have My Double Unveiled: The dissipative quantum model of brain (Advances in Consciousness Research) because this book offers to you readable information. Do you oftentimes have book but you don't get what it's exactly about. Oh come on, that would not happen if you have this in the hand. The Enjoyable blend here cannot be questionable, like treasuring beautiful island. Use you still want to miss it? Find this book as well as read it from now!

John Fouts:

Is it you who having spare time then spend it whole day by watching television programs or just resting on the bed? Do you need something totally new? This My Double Unveiled: The dissipative quantum model of brain (Advances in Consciousness Research) can be the solution, oh how comes? A fresh book you know. You are thus out of date, spending your spare time by reading in this brand-new era is common not a nerd activity. So what these books have than the others?
