Information and Managerial Wisdom

J. D. R. de Raadt

Information and Managerial Wisdom J. D. R. de Raadt
In this book, de Raadt examines concepts of informatics – such as dis-information, noise and uncertainty generated by global interconnectivity – that explain the destabilising effect of information technology on society. These concepts are derived from cybernetics and are pedagogically presented to provide students an understanding of the social and cultural context of information. This should help them apply information technology in subservience to human endeavours rather than the contemporary practise of the reverse. "...de Raadt has produced a highly readable text which enjoins us to modify the approach that we use to solve our world problems. He should be commended for his effort: it follows in the tradition of famous predecessors such as Stafford Beer and Geoffrey Vickers who have trodden similar territory." (John P. van Gigch)
