Multimedia Analysis, Processing and Communications (Studies in Computational Intelligence)

Multimedia Analysis, Processing and Communications (Studies in Computational Intelligence)

This book has brought 24 groups of experts and active researchers around the world together in image processing and analysis, video processing and analysis, and communications related processing, to present their newest research results, exchange latest experiences and insights, and explore future directions in these important and rapidly evolving areas. It aims at increasing the synergy between academic and industry professionals working in the related field. It focuses on the state-of-the-art research in various essential areas related to emerging technologies, standards and applications on analysis, processing, computing, and communication of multimedia information.

The target audience of this book is researchers and engineers as well as graduate students working in various disciplines linked to multimedia analysis, processing and communications, e.g., computer vision, pattern recognition, information technology, image processing, and artificial intelligence. The book is also meant to a broader audience including practicing professionals working in image/video applications such as image processing, video surveillance, multimedia indexing and retrieval, and so on. We hope that the researchers, engineers, students and other professionals who read this book would find it informative, useful and inspirational toward their own work in one way or another.

From reader reviews:

Mavis Strain:

Have you spare time for the day? What do you do when you have more or little spare time? Sure, you can choose the suitable activity regarding spend your time. Any person spent their own spare time to take a move, shopping, or went to the actual Mall. How about open or even read a book called Multimedia Analysis, Processing and Communications (Studies in Computational Intelligence)? Maybe it is to become best activity for you. You know beside you can spend your time using your favorite's book, you can more intelligent than before. Do you agree with their opinion or you have other opinion?

Kristy Taylor:

In this 21st millennium, people become competitive in each way. By being competitive right now, people have do something to make all of them survives, being in the middle of often the crowded place and notice through surrounding. One thing that occasionally many people have underestimated that for a while is reading. Yes, by reading a reserve your ability to survive boost then having chance to remain than other is high. For yourself who want to start reading a book, we give you this particular Multimedia Analysis, Processing and Communications (Studies in Computational Intelligence) book as starter and daily reading e-book. Why, because this book is greater than just a book.

Kelly Brooks:

A lot of people always spent their very own free time to vacation or maybe go to the outside with them friends and family or their friend. Do you know? Many a lot of people spent they will free time just watching TV, or playing video games all day long. In order to try to find a new activity that is look different you can read a book. It is really fun for you personally. If you enjoy the book that you simply read you can spent all day long to reading a e-book. The book Multimedia Analysis, Processing and Communications (Studies in Computational Intelligence) it is quite good to read. There are a lot of individuals who recommended this book. These were enjoying reading this book. If you did not have enough space to create this book you can buy often the e-book. You can m0ore easily to read this book from the smart phone. The price is not too costly but this book features high quality.

Alexander Ray:

Reading a e-book make you to get more knowledge from it. You can take knowledge and information from your book. Book is written or printed or outlined from each source which filled update of news. With this modern era like now, many ways to get information are available for anyone. From media social such as newspaper, magazines, science publication, encyclopedia, reference book, new and comic. You can add your understanding by that book. Do you want to spend your spare time to open your book? Or just in search of the Multimedia Analysis, Processing and Communications (Studies in Computational Intelligence) when you needed it?
