Nonlinear Control Systems and Power System Dynamics (The International Series on Asian Studies in Computer and Information Science) Qiang Lu, Yuanzhang Sun, Shengwei Mei
Nonlinear Control Systems and Power System Dynamics presents a comprehensive description of nonlinear control of electric power systems using nonlinear control theory, which is developed by the differential geometric approach and nonlinear robust control method. This book explains in detail the concepts, theorems and algorithms in nonlinear control theory, illustrated by step-by-step examples. In addition, all the mathematical formulation involved in deriving the nonlinear control laws of power systems are sufficiently presented. Considerations and cautions involved in applying nonlinear control theory to practical engineering control designs are discussed and special attention is given to the implementation of nonlinear control laws using microprocessors.
Nonlinear Control Systems and Power System Dynamics serves as a text for advanced level courses and is an excellent reference for engineers and researchers who are interested in the application of modern nonlinear control theory to practical engineering control designs.

From reader reviews:

Rita Dubois:

Spent a free the perfect time to be fun activity to accomplish! A lot of people spent their down time with their family, or all their friends. Usually they performing activity like watching television, likely to beach, or picnic inside the park. They actually doing same every week. Do you feel it? Do you need to something different to fill your free time/ holiday? May be reading a book may be option to fill your cost-free time/ holiday. The first thing that you ask may be what kinds of publication that you should read. If you want to test look for book, may be the e-book untitled Nonlinear Control Systems and Power System Dynamics (The International Series on Asian Studies in Computer and Information Science) can be good book to read. May be it may be best activity to you.

Nancy Smith:

Is it anyone who having spare time then spend it whole day simply by watching television programs or just telling lies on the bed? Do you need something totally new? This Nonlinear Control Systems and Power System Dynamics (The International Series on Asian Studies in Computer and Information Science) can be the response, oh how comes? It's a book you know. You are therefore out of date, spending your extra time by reading in this fresh era is common not a nerd activity. So what these publications have than the others?

Carol Benally:

As we know that book is very important thing to add our information for everything. By a e-book we can know everything we wish. A book is a range of written, printed, illustrated as well as blank sheet. Every year had been exactly added. This e-book Nonlinear Control Systems and Power System Dynamics (The International Series on Asian Studies in Computer and Information Science) was filled in relation to science. Spend your time to add your knowledge about your scientific disciplines competence. Some people has diverse feel when they reading any book. If you know how big benefit of a book, you can really feel enjoy to read a guide. In the modern era like at this point, many ways to get book that you wanted.

Donna Eldridge:

A lot of people said that they feel uninterested when they reading a reserve. They are directly felt it when they get a half areas of the book. You can choose the book Nonlinear Control Systems and Power System Dynamics (The International Series on Asian Studies in Computer and Information Science) to make your personal reading is interesting. Your current skill of reading ability is developing when you like reading. Try to choose basic book to make you enjoy to study it and mingle the sensation about book and reading through especially. It is to be first opinion for you to like to open a book and study it. Beside that the book Nonlinear Control Systems and Power System Dynamics (The International Series on Asian Studies in Computer and Information Science) can to be your friend when you're experience alone and confuse using what must you're

doing of that time.
