Automorphic Forms on Adele Groups. (AM-83) (Annals of Mathematics Studies) Stephen S. Gelbart

This volume investigates the interplay between the classical theory of automorphic forms and the modern theory of representations of adele groups. Interpreting important recent contributions of Jacquet and Langlands, the author presents new and previously inaccessible results, and systematically develops explicit consequences and connections with the classical theory. The underlying theme is the decomposition of the regular representation of the adele group of GL(2). A detailed proof of the celebrated trace formula of Selberg is included, with a discussion of the possible range of applicability of this formula. Throughout the work the author emphasizes new examples and problems that remain open within the general theory.

TABLE OF CONTENTS: 1. The Classical Theory 2. Automorphic Forms and the Decomposition of L^2(PSL(2,R) 3. Automorphic Forms as Functions on the Adele Group of GL(2) 4. The Representations of GL(2) over Local and Global Fields 5. Cusp Forms and Representations of the Adele Group of GL(2) 6. Hecke Theory for GL(2) 7. The Construction of a Special Class of Automorphic Forms 8. Eisenstein Series and the Continuous Spectrum 9. The Trace Formula for GL(2) 10. Automorphic Forms on a Quaternion Algebra

From reader reviews:

Allison Devore:

Reading a guide tends to be new life style in this particular era globalization. With reading you can get a lot of information that will give you benefit in your life. Using book everyone in this world can share their idea. Guides can also inspire a lot of people. A great deal of author can inspire their reader with their story or their experience. Not only the storyplot that share in the publications. But also they write about the knowledge about something that you need instance. How to get the good score toefl, or how to teach your young ones, there are many kinds of book which exist now. The authors on this planet always try to improve their talent in writing, they also doing some study before they write to the book. One of them is this Automorphic Forms on Adele Groups. (AM-83) (Annals of Mathematics Studies).

Wendell Darnell:

Often the book Automorphic Forms on Adele Groups. (AM-83) (Annals of Mathematics Studies) has a lot associated with on it. So when you check out this book you can get a lot of profit. The book was written by the very famous author. The writer makes some research ahead of write this book. That book very easy to read you can find the point easily after perusing this book.

Tonia Lee:

Don't be worry should you be afraid that this book can filled the space in your house, you might have it in e-book means, more simple and reachable. That Automorphic Forms on Adele Groups. (AM-83) (Annals of Mathematics Studies) can give you a lot of close friends because by you checking out this one book you have factor that they don't and make a person more like an interesting person. This particular book can be one of one step for you to get success. This guide offer you information that possibly your friend doesn't realize, by knowing more than some other make you to be great folks. So , why hesitate? Let us have Automorphic Forms on Adele Groups. (AM-83) (Annals of Mathematics Studies).

Jacqueline Kellett:

As a scholar exactly feel bored to be able to reading. If their teacher questioned them to go to the library or make summary for some book, they are complained. Just tiny students that has reading's spirit or real their pastime. They just do what the educator want, like asked to go to the library. They go to there but nothing reading significantly. Any students feel that examining is not important, boring and can't see colorful pics on there. Yeah, it is for being complicated. Book is very important for you. As we know that on this period, many ways to get whatever we would like. Likewise word says, many ways to reach Chinese's country. Therefore this Automorphic Forms on Adele Groups. (AM-83) (Annals of Mathematics Studies) can make you sense more interested to read.
